Topic 4 - JSON & Data Structure Basics

n8n Hands-On Beginner Course | Workflow Evidence

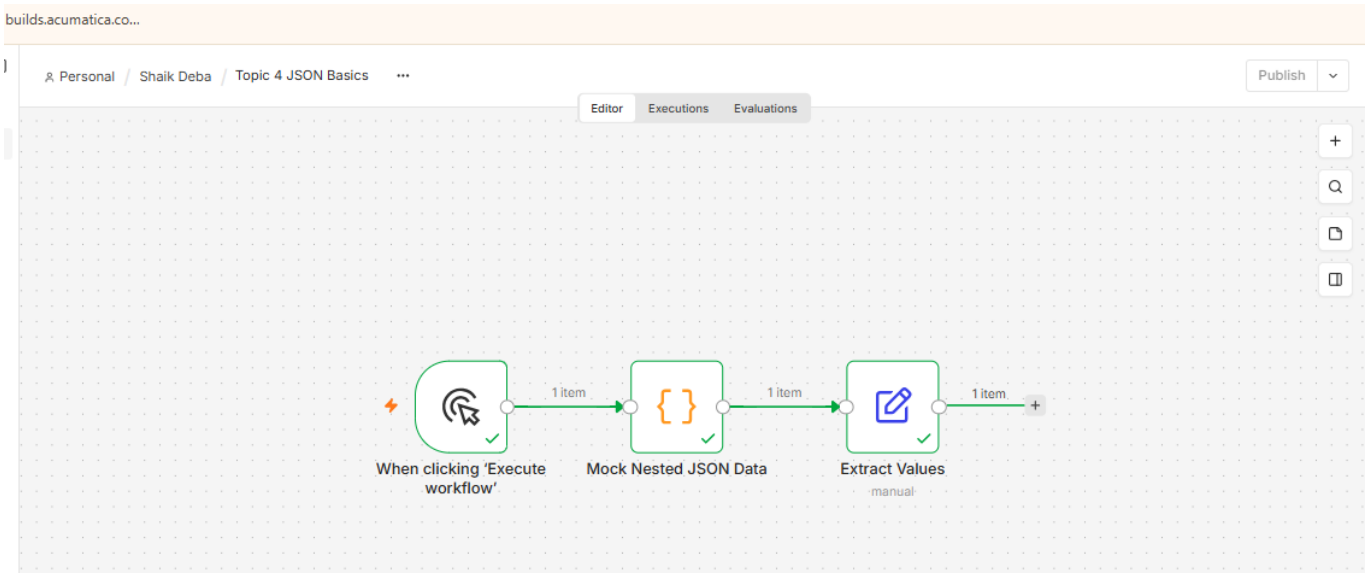

01 | Nested JSON Data

The Code node successfully generates a nested customer object, address fields, and an orders array. The output panel displays one item.

02 | Successful Workflow Execution

Manual Trigger, Mock Nested JSON Data, and Extract Values all show green checkmarks. One item is processed through the workflow.

03 | Extracted Values

The Extract Values node uses expressions to retrieve customerName, cityOfCustomer, and firstOrderTotal. The visible output is Jane Doe, New York, and 45.99.
